

Cameron Bennett

Computer Engineer

Toronto, ON
(647) 808-4484
cambennett72@gmail.com

EXPERIENCE

Autonomous Vehicle Organization · Toronto, ON **Computer Vision Engineer**
May 2024 – Present

- Owned the full product end to end, from on-premises data collection at heavy-industry sites through cloud storage to the customer-facing web application.
- Built and maintained on-premises Kubernetes clusters running containerized Python services that produce and process site data in real time.
- Developed the front end and back end of the cloud platform customers use to explore that data.
- Designed and built a mobile app that transmits over UHF and VHF radio, enabling data collection in underground mines with no network connectivity.
- Led client meetings to define requirements, then scoped and delivered the resulting features directly.

Woodgrove Solutions · Toronto, ON **Computer Engineer**
May 2022 – September 2023

- Designed, trained, and deployed computer vision systems for mineral processing on mining projects worldwide.
- Feedback from these systems reduced errors and waste in Woodgrove's frothing technology.

EDUCATION

Queen's University · Kingston, ON **BASc, Computer Engineering**
September 2020 – May 2024

- Capstone project, an AI interview-practice tool, was incorporated as a business and acquired paying customers.
- Team Lead, Queen's Biomechatronics team.

Crescent School · Toronto, ON **Ontario Secondary School Diploma**
September 2014 – May 2020 · Advanced Placement curriculum, graduated with Honours

SKILLS

Programming	Python, JavaScript, C++, React
Computer Vision & AI	OpenCV, YOLO, LLM-assisted development (Claude Code, Codex)
AWS	Lambda, DynamoDB, Cognito, Amplify, RDS, EC2, S3, CodePipeline, API Gateway
Infrastructure	Linux, Docker, Kubernetes, RabbitMQ
Systems	Signal processing, radio frequency systems

HOBBIES

Squash, Muay Thai, Sailing, Water Taxi Captain

LANGUAGES

English, French
